Summary

Analytical and detail-oriented Data Analyst who turns raw data into clear, actionable insights that help businesses make smarter decisions. Built 8 end-to-end analytics projects covering sales, finance, HR, operations, and supply chain using Excel, SQL, Power BI, Python, and Pandas. Strong communicator and collaborative problem-solver, seeking opportunities in Data Analytics and Business Intelligence.

Education

Al-Azhar University **2022 – 2026**
Bachelor's Degree in Education (Computer Science) *Giza, Egypt*

Experience

Ministry of Youth & Sports of Egypt
Artificial Intelligence Intern *Egypt*

- Completed a Generative AI Tools and System Analysis training program delivered in collaboration with Tawakkalna / Microsoft and Care Egypt.
- Applied AI tools and analytical thinking to structured problem-solving exercises, working collaboratively with a cohort of fellow trainees.

National Telecommunication Institute (NTI)
Artificial Intelligence Ambassador *Egypt*

- Participated in the AI Ambassadors Program, building AI awareness and practical knowledge of AI applications and sharing insights with peers.

Projects

Call Center Performance Dashboard

- Designed an interactive Power BI dashboard tracking call center KPIs and agent performance to support operational decisions.

Finance KPI Dashboard

- Built a finance dashboard with key performance indicators to monitor financial performance and month-over-month trends.

HR Analytics

- Analyzed workforce data and developed visual reports to surface HR insights and support people-related decisions.

Sales Analytics

- Transformed raw sales data into structured analysis and an interactive dashboard to track performance and identify trends.

Car Sales Analysis (Excel)

- Cleaned and analyzed car sales data using 3 core Excel techniques: Pivot Tables, lookup functions, and conditional formatting.

Supply Chain Analysis

- Analyzed supply chain data to evaluate operational performance and highlight improvement opportunities.

Store Dashboard

- Created a store performance dashboard visualizing sales and key business metrics for easy monitoring.

World Cup Data Analysis

- Explored historical World Cup data to uncover patterns and present findings through clear visualizations.

Skills

Data Analysis Tools: Excel (Pivot Tables, VLOOKUP/XLOOKUP, Conditional Formatting, Power Query), Power BI, SQL
Programming & Libraries: Python, Pandas
Analytics Skills: Data Cleaning, Data Preprocessing, Data Visualization, KPI Development, Dashboard Design, Business Analysis
Databases: Relational Databases, Query Writing and Optimization, Table Joins
Soft Skills: Analytical Thinking, Problem-Solving, Critical Thinking, Attention to Detail, Communication, Teamwork & Collaboration, Time Management, Adaptability, Data Storytelling, Continuous Learning
Other: Data Entry, Typing Speed 50 WPM
Languages: Arabic, English

Certifications

SQL and Relational Databases 101 — Cognitive Class (IBM Skills Network)

SQL (Basic) Certificate — HackerRank

Introduction to Power Query in Excel Basics — Simplilearn (Powered by Microsoft)

Generative AI Tools & System Analysis — Tawakkalna / Microsoft, Care Egypt & Ministry of Youth and Sports
